DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 96, 101-102 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 5,702,373. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both include main structural limitations such as a braid member of super elastic ribbons, a polymeric inner liner, a polymeric outer cover.

Claims 96-98, 101-103 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5-6, 9-10, 22-23, 27-29 of U.S. Patent No. 6,143,013. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both include main structural limitations such as a braid member of super elastic ribbons, a polymeric inner liner, a polymeric outer cover.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 101 recites the limitation "the polymers" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 96-103 are rejected under 35 U.S.C. 102(b) as being anticipated by SAMSON-5,891,112.

As to claims 96-98 and 102, see col. 8, line 66 to col. 9, line 7; claim 5, Fig. 1-11B of SAMSON-'112.

As to claims 99-100, see col. 14, lines 23- 35, claim 5 and Fig. 11A-11B, SAMSON-'112.

As to claim 101, see claims 1-4, SAMSON-'112.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 103 are rejected under 35 U.S.C. 103(a) as being unpatentable over SAMSON-5,891,112.

SAMSON-'112 discloses substantially all structural limitations as recited in the claim, except for the additional elements such as vanadium, chromium, manganese, iron and cobalt. These elements are well known elements to be included in the Ni-Ti alloy so as to modify the Ni-Ti alloy according to different applications. It would have been obvious to one of ordinary skill in the art at the time the invention was made to add vanadium, chromium, iron, manganese, or cobalt to Ni-Ti alloy to modify the characteristics of the Ni-Ti alloy to fit different applications as one desires.
